

FEATURE DROP · WEEK 39

Three steps toward an autonomous back office.

01 Talk to your ERP

02 Board view for data tables

03 Skill tests

Start a voice call. Ask about your orders.

Ask the ERP directly: which orders wait for a PO, what came in last month. Answers in a voice call, without building a report.

Invoice exceptions, as a board.

Invoices inside tolerance book themselves. Finance gets only the ones that need judgement, lane by lane.

See which check failed and why before a skill runs on its own. Every step earns its autonomy on evidence.

LIVE NOW

The routine runs on
its own. People take
the cases that need
judgement.

And they steer the agents, one
step at a time. Clips of all three:
link in the first comment.
